	Germany	24	John Toop	1810		2	563

Background

There are currently 24 separate segments in this set of family trees. These are contained in over 500 pages below. Since the previous revision, we have filled in gaps, adding about 50 pages and several new segments.

The newest segments are numbers 11, 12 & 13 in the table above and, although a couple of the names are not Toop, they are very old and could easily have morphed to Toop and been the forerunner of some of the other segments. The first couple were very wealthy and that is why there are records going so far back in time. Segment 12 was so wealthy that they bought a baronetcy.

Privacy

For privacy reasons this website does not intentionally include references to anyone who is currently alive. To implement this, we have excluded everyone born after about 1920. As a consequence, to find the place in the trees which is relevant to you, you need to search for an ancestor who was born prior to 1920.

For more information about privacy, please see what is written under the "Legals" tab in the main website.

Abbreviations & Page Layout

In the following pages, some abbreviations are used including:

Abbreviation	Stands For
b.	"born" of date of birth.
c.	"christened" or date of baptism.
d.	"death" or date of death.
bu.	"buried" or date of interment.
m.	"marriage" or date of marriage.
Q1	First quarter of the year or January-March inclusive. Likewise for Q2, Q3 & Q4.
abt	"about"
+	This person married the person immediately above.
⑦	Number in a circle tells the number of this child within the family. For example ⑦ means the 7 th child.

Dates are written in the English manner of DD/MM/YYYY.

The header of each page shows the lineage back to the first person in this segment of the tree.

The vertical lines show the number of generations from the first person in this segment of the tree.

How to Search for your Ancestors

Due to the large number of Toops in these tree segments, we recommend searching for the people of interest to you by using your internet browser's search function. As every browser works a little differently, you may have to experiment to find exactly what works for you. We can recommend the following general ideas:

1. To search for a specific person, start by pressing <CTRL> F. That means press down the CTRL key and then the "F" key at the same time. This will open a "search bar" on the screen.
2. Click on the search bar and type the name of your ancestor. Then press the "ENTER" key. If there are any occurrences of this in the file, the cursor will go to the first occurrence. If there are multiple occurrences, you can proceed to the others by clicking on the "next" or "previous" arrows next to the search bar.
3. If you cannot find what you want, try other word combinations until you find something that works. Some hints are:
 - a. Be as specific as you can. For example "william george" is better than "william" because there will be hundreds of occurrences of "william" that you would have to sort through.
 - b. Try to search for an uncommon name, for example the family name of a wife (like Davidge). This is to avoid having to search through many Toops with the same name.
 - c. The name of your earliest ancestor that you know of. A more recent ancestor may not have been included because some of his/her relatives of the same generation may still be alive, so that whole generation may not have been included.
 - d. Alternatively, you may search by date. Here again there may be multiple entries with the same date so you may have to work through a number of entries until you find the one of interest to you.
 - e. If you cannot find your ancestor in these trees, please contact us via the "Contact Us" tab and we should be able to help.
4. Once you find the segment of interest, please check it and let us know if you find any errors. Please provide corroborating evidence when you suggest changes.
5. We would like to expand the tree so if you have any additional information, please contact us via the "Contact Us" tab.

The authors, being amateur genealogists, have endeavoured to be thorough and diligent with tracing of all dates and connections. However, there are specific errors where dates of baptism are interchanged with date of birth and dates of burial are interchanged with date of death. In most cases these dates should be similar, but in some cases, we have found that the baptism occurred several years after birth. Please let us know if you are able to provide more exact information.

How to Search for Places

To find the location or other information about the places mentioned in the tree, we suggest that you type the name of the town and county into an internet search engine like Google eg. "lytchett minster dorset". Google maps is useful for showing the location while Wikipedia is useful for providing information about the place including historical material.

John Towpe b. abt 1580

d. 20/11/1643 Berkley, Somerset, England
